This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Title Page**

Amygdala reward reactivity mediates the association between preschool stress response and depression severity

Michael S. Gaffrey, Ph.D.<sup>a</sup>, Deanna M. Barch, Ph.D.<sup>a,b,c</sup>, Ryan Bogdan, Ph.D.<sup>b</sup>, Katrina Farris<sup>a</sup>, Steven E. Petersen, Ph.D.<sup>b,c</sup>, and Joan L. Luby, M.D.<sup>a</sup>

Location: Washington University in St. Louis  
Departments of Psychiatry<sup>a</sup>, Psychological and Brain Sciences<sup>b</sup>, and  
Radiology<sup>c</sup>  
Saint Louis, Missouri

Correspondence/: Michael S. Gaffrey, Ph.D.  
Reprints Washington University School of Medicine  
Department of Psychiatry (Child Division)  
660 South Euclid Avenue  
Campus Box: 8514  
St. Louis, MO 63110

Keywords: depression, development, stress, reward processing, fMRI, amygdala

Short title: Reward, stress, and depression in preschoolers

Words in abstract: 250

Words in text: 4,000

Number of Tables: 2

Number of Figures: 3

Supplemental information: 1
