Machine Learning of Functional Magnetic Resonance Imaging Network Connectivity Predicts Substance Abuse Treatment Completion

Vaughn R. Steele, Ph.D, J. Michael Maurer, M.S., Mohammad R. Arbabshirani, Ph.D., Eric D. Claus, Ph.D., Brandi C. Fink, Ph.D., Vikram Rao, M.S., Vince D. Calhoun, Ph.D., Kent A. Kiehl, Ph.D.

PII: S2451-9022(17)30121-0

DOI: [10.1016/j.bpsc.2017.07.003](https://doi.org/10.1016/j.bpsc.2017.07.003)

Reference: BPSC 172

To appear in: *Biological Psychiatry: Cognitive Neuroscience and Neuroimaging*

Received Date: 12 June 2017

Revised Date: 2451-9022 2451-9022

Accepted Date: 8 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
