This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- So far, many mental health internet-based platforms (IBP) were developed and tested.
- Few of these IBPs were made widely available for mental health patients.
- OpenSIMPLe evaluated the large-scale implementation of an IBP for bipolar disorder.
- Positive outcomes regarding satisfaction, usability and helpfulness were found.
- Attrition rates were high, requiring further research about retention factors.
