This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Title**

Implementation of national palliative care guidelines in Swedish acute care hospitals: A qualitative content analysis of stakeholders' perceptions

**Authors**

S Lind<sup>1,2</sup>, L Wallin<sup>1,3,7</sup>, T Brytting<sup>4</sup>, C J Fürst<sup>5</sup>, J Sandberg<sup>6</sup>

**Affiliations**

<sup>1</sup>Department of Neurobiology, Care Sciences and Society, Karolinska Institutet, Huddinge, Sweden

<sup>2</sup> Department of Health Care Sciences, Palliative Research Centre, Ersta Sköndal Bräcke University College, Stockholm, Sweden

<sup>3</sup> School of Education, Health and Social Science, Dalarna University, Sweden

<sup>4</sup>The Institute of Organisation and Worklife Ethics, Ersta Sköndal Bräcke University College, Stockholm, Sweden

<sup>5</sup>Institute for Palliative Care at Lund University and Region Skåne, Lund, Sweden

<sup>6</sup>Department of Nursing Science, School of Health Sciences, Jönköping University, Sweden

<sup>7</sup> Department of Health and Care Sciences, Sahlgrenska Academy, University of Gothenburg, Gothenburg, Sweden

**Highlights**

- There is little knowledge about national palliative care guidelines at all levels of the health care organisation
- There is a problematic inconsistency between acute and palliative care at hospitals
- Poor communication and teamwork among staff are obstacles to implementation
- An opportunity for implementation is the staff's expressed need for palliative training
