Journal: Clinical Imaging

Pictorial Essay: Abstract (100), Words (2618), References (51), Figures (21)

Running Title: Utility of spine diffusion MRI (26 characters)

Keywords: MRI, DWI, spine imaging

Disclosure: TMS received research support from the National Institute of Aging (NIH1K23 AG048622-01). YWL received research support from the National Institute for Neurological Disorders and Stroke (NIH R01 NS039135-11 & R21 NS090349). This work was supported in part by the Center for Advanced Imaging Innovation and Research, an NIH NIBIB Biomedical Technology Resource Center (Grant P41EB017183).
