Can Dual-Energy CT Improve Visualization of Hypo-enhancing Liver Lesions in Portal Venous Phase? Assessment of Advanced Image-Based Virtual Monoenergetic Images

Damiano Caruso, Carlo N. De Cecco, U. Joseph Schoepf, Amanda R. Schaefer, Parker W. Leland, Dustin Johnson, Andrea Laghi, Andrew D. Hardie

PII: S0899-7071(16)30157-7
DOI: doi: [10.1016/j.clinimag.2016.10.015](https://doi.org/10.1016/j.clinimag.2016.10.015)
Reference: JCT 8135

To appear in: *Journal of Clinical Imaging*

Received date: 27 August 2016
Revised date: 28 September 2016
Accepted date: 17 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Can Dual-Energy CT Improve Visualization of Hypo-enhancing Liver Lesions in Portal Venous**Phase? Assessment of Advanced Image-Based Virtual Monoenergetic Images**
