

## Accepted Manuscript

Title: A unique case of total metastatic lobular breast carcinoma, originating from diffused microcalcifications, presented in a postmenopausal woman, without clinical manifestations

Authors: Athanasios Douskos, Sofoklis Stavrou, Aris Giannos, Maria Sotiropoulou, Eleni Feida, Constantine Dimitrakakis, Peter Drakakis, Alexandros Rodolakis

PII: S2210-2612(18)30040-3  
DOI: <https://doi.org/10.1016/j.ijscr.2018.01.026>  
Reference: IJSCR 3018

To appear in:

Received date: 24-12-2017  
Revised date: 10-1-2018  
Accepted date: 15-1-2018

Please cite this article as: Douskos Athanasios, Stavrou Sofoklis, Giannos Aris, Sotiropoulou Maria, Feida Eleni, Dimitrakakis Constantine, Drakakis Peter, Rodolakis Alexandros. A unique case of total metastatic lobular breast carcinoma, originating from diffused microcalcifications, presented in a postmenopausal woman, without clinical manifestations. *International Journal of Surgery Case Reports* <https://doi.org/10.1016/j.ijscr.2018.01.026>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
