Title: Altered neural responsivity to food cues in relation to food preferences, but not appetite-related hormone concentrations after RYGB-surgery

Authors: Harriët F.A. Zoon, Suzanne E.M. de Bruijn, Paul A.M. Smeets, Cees de Graaf, Ignace M.C. Janssen, Wendy Schijns, Edo O. Aarts, Gerry Jager, Sanne Boesveldt

PII: S0166-4328(18)30601-6
DOI: <https://doi.org/10.1016/j.bbr.2018.07.016>
Reference: BBR 11509

To appear in: *Behavioural Brain Research*

Received date: 30-4-2018
Revised date: 19-7-2018
Accepted date: 20-7-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Altered neural responsivity to food cues in relation to food preferences, but not appetite-related hormone concentrations after RYGB-surgery

Running head: RYGB: Neural responsivity and gut hormone levels
