Title: Dorsolateral prefrontal cortex bridges bilateral primary somatosensory cortices during cross-modal working memory

Authors: Di Zhao, Yixuan Ku

PII: S0166-4328(17)31433-X
DOI: <https://doi.org/10.1016/j.bbr.2018.04.053>
Reference: BBR 11419

To appear in: *Behavioural Brain Research*

Received date: 27-8-2017
Revised date: 29-4-2018
Accepted date: 30-4-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Dorsolateral prefrontal cortex bridges bilateral primary somatosensory cortices during cross-modal working memory
