Chronic stress as a risk factor for Alzheimer's disease: Roles of microglia-mediated synaptic remodeling, inflammation, and oxidative stress

Kanchan Bisht, Kaushik Sharma, Marie-Ève Tremblay

PII: S2352-2895(18)30007-9

DOI: [10.1016/j.ynstr.2018.05.003](https://doi.org/10.1016/j.ynstr.2018.05.003)

Reference: YNSTR 109

To appear in: *Neurobiology of Stress*

Received Date: 18 January 2018

Revised Date: 23 February 2018

Accepted Date: 14 May 2018

Please cite this article as: Bisht K, Sharma K, Tremblay Marie-È, Chronic stress as a risk factor for Alzheimer's disease: Roles of microglia-mediated synaptic remodeling, inflammation, and oxidative stress, *Neurobiology of Stress* (2018), doi: 10.1016/j.ynstr.2018.05.003.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Chronic stress as a risk factor for Alzheimer's disease:
roles of microglia-mediated synaptic remodeling, inflammation, and oxidative stress**

Acknowledgements

We are grateful to Marie-Kim St-Pierre, Katherine Picard, and Mathilde S. Henry for their critical revision of the manuscript. This work was supported by a CIHR Foundation Scheme grant to MET and an excellence scholarship from Fondation du CHU de Québec to KB. MET is a Canada Research Chair (Tier 2) in *Neuroimmune plasticity in health and therapy*.

Keywords

Microglia; stress; Alzheimer's disease; neurodegeneration; neuroinflammation; synaptic remodeling; microglial phenotypes; dark microglia.
