Title: A Novel Method for Oxygen Glucose Deprivation Model in Organotypic Spinal Cord Slices

Authors: Jing-Jie Liu, Xiao-yan Ding, Li Xiang, Feng Zhao, Sheng-Li Huang

PII: S0361-9230(17)30061-8
DOI: <https://doi.org/10.1016/j.brainresbull.2017.10.010>
Reference: BRB 9312

To appear in: *Brain Research Bulletin*

Received date: 5-2-2017
Revised date: 10-10-2017
Accepted date: 12-10-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A Novel Method for Oxygen Glucose Deprivation Model in Organotypic Spinal Cord

Highlights

- This study established a model to closely mimic spinal cord hypoxic-ischemic injury.
- OGD model is obtained from long-term cultured organotypic spinal cord slices.
- For OGD model, 60 minutes was the optimal time.
