Title: Quantifying Turning Behavior and Gait in Parkinson's disease using Mobile Technology

Authors: Mandy Miller Koop, Sarah J. Ozinga, Anson B. Rosenfeld, Jay L. Alberts

PII: S2451-8301(18)30001-3
DOI: <https://doi.org/10.1016/j.ibror.2018.06.002>
Reference: IBROR 35

To appear in:

Received date: 23-1-2018
Accepted date: 16-6-2018

Please cite this article as: Koop MM, Ozinga SJ, Rosenfeld AB, Alberts JL, Quantifying Turning Behavior and Gait in Parkinson's disease using Mobile Technology, *IBRO Reports* (2018), <https://doi.org/10.1016/j.ibror.2018.06.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Quantifying Turning Behavior and Gait in Parkinson's disease using Mobile Technology

Mandy Miller Koop¹, Sarah J. Ozinga¹, Anson B. Rosenfeldt,¹ and Jay L. Alberts^{1,2}

Running Title: Mobile technology quantifies turning and gait in PD

Highlights

- Improvements in mobility were detected from meds using a mobile device IMU in PD.
