Research report

Synaptic dysfunction and altered excitability in C9ORF72 ALS/FTD

Alexander Starr, Rita Sattler

PII: S0006-8993(18)30069-6

DOI: <https://doi.org/10.1016/j.brainres.2018.02.011>

Reference: BRES 45665

To appear in: *Brain Research*

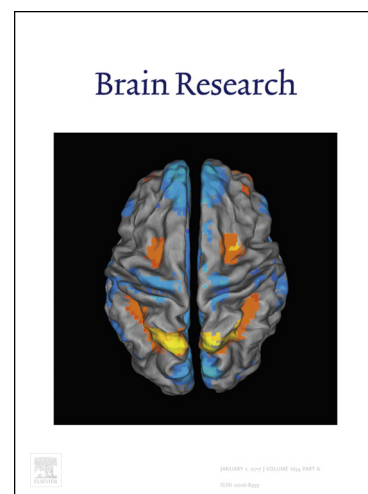

Received Date: 30 November 2017

Revised Date: 6 February 2018

Accepted Date: 10 February 2018

Please cite this article as: A. Starr, R. Sattler, Synaptic dysfunction and altered excitability in C9ORF72 ALS/FTD, *Brain Research* (2018), doi: <https://doi.org/10.1016/j.brainres.2018.02.011>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Synaptic dysfunction and altered excitability in C9ORF72 ALS/FTD
