Research report

Retrograde influences of SCG axotomy on uninjured preganglionic neurons

Sean M. Gannon, Kiel Hawk, Brian F. Walsh, Aminata Coulibaly, Lori G. Isaacson

PII: S0006-8993(18)30202-6

DOI: <https://doi.org/10.1016/j.brainres.2018.04.014>

Reference: BRES 45754

To appear in: *Brain Research*

Received Date: 6 October 2017

Revised Date: 6 April 2018

Accepted Date: 13 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Retrograde influences of SCG axotomy on uninjured preganglionic neurons

Sean M. Gannon^{1,3}, Kiel Hawk^{1,2}, Brian F. Walsh³, Aminata Coulibaly^{1,2}, Lori G. Isaacson^{1,2,3}

¹Center for Neuroscience and Behavior

²Graduate Program in Cell, Molecular, and Structural Biology

³Department of Biology

Miami University

Oxford, OH 45056

Note: the first two authors contributed equally to this work.
