

## Accepted Manuscript

Title: Assessing mouse behaviour throughout the light/dark cycle using automated in-cage analysis tools

Authors: Rasneer S. Bains, Rowland R. Sillito, J. Douglas Armstrong, Heather L. Cater, Gareth Banks, Patrick M. Nolan

PII: S0165-0270(17)30113-9  
DOI: <http://dx.doi.org/doi:10.1016/j.jneumeth.2017.04.014>  
Reference: NSM 7720

To appear in: *Journal of Neuroscience Methods*

Received date: 14-2-2017  
Revised date: 21-4-2017  
Accepted date: 22-4-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Automated assessment of mouse home-cage behaviour is robust and reliable
- Analysis over multiple light/dark cycles improves ability to classify behaviours
- Combined RFID and video analysis enables home-cage analysis in group housed animals
