List of tables:

1. Comparison of system designs

List of figures:

1. PD2: Valli puts trunk through browsing hole in wall to retrieve banana from the pipe button
2. PD3: Sewing pedal button in wooden frame
3. PD4: Buttons with tactile and haptic feedback
4. PD5: Fitting radio buttons to the Noahs Ark elephant enclosure
5. PD5: Elephants at Noah's Ark playing with the radio buttons

HIGHLIGHTS

- A Research through Design approach was used to develop novel enrichment for captive elephants.
- Making and testing devices facilitated participatory design with keepers and elephants.
- Hidden sensors enabled trunk interactions with tactile surfaces mounted in wooden frames.
- Elephants were able to control the production of different sounds.
