Hypobaric Hypoxia induced learning and memory impairment: Elucidating the role of Small Conductance Ca^{2+} -activated K^{+} channels

Neetu Kushwah, Vishal Jain, Aastha Dheer, Rahul Kumar, Dipti Prasad, Nilofar Khan

PII: S0306-4522(18)30501-3

DOI: <https://doi.org/10.1016/j.neuroscience.2018.07.026>

Reference: NSC 18565

To appear in: *Neuroscience*

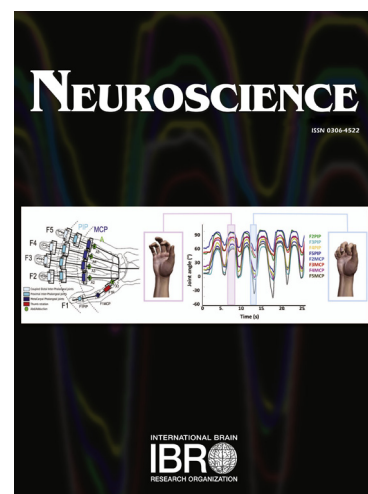

Received Date: 2 May 2018

Revised Date: 11 July 2018

Accepted Date: 13 July 2018

Author Details:

Neetu Kushwah, PhD scholar, Department of Neurobiology, Defence Institute of Physiology and Allied Sciences (DIPAS), DRDO, Lucknow road, Timarpur, New Delhi-110054, India. neetukushwah27@gmail.com

Authors' contributions:

Neetu Kushwah designed the study, performed all the experiments, analyzed data and wrote the manuscript. Vishal Jain helped out in study design, assisted in data analysis and writing of the manuscript. Aastha Dheer and Rahul Kumar supported during hypobaric hypoxia exposures, handling the hypoxia chamber and sample collection. Dipti Prasad helped in administrative processing of the manuscript. Nilofar Khan designed the study, assisted in data analysis and manuscript writing. All authors have read and approved the final manuscript.

Keywords: Hypobaric hypoxia, SK channels, learning and memory, Neurodegeneration, Hippocampus, Apamin.
