EGR-1 expression in catecholamine-synthesizing neurons reflects auditory learning and correlates with responses in auditory processing areas

Jennifer B. Dai, Yining Chen, Jon T. Sakata

PII: S0306-4522(18)30223-9

DOI: <https://doi.org/10.1016/j.neuroscience.2018.03.032>

Reference: NSC 18370

To appear in: *Neuroscience*

Received Date: 29 July 2017

Accepted Date: 20 March 2018

Please cite this article as: J.B. Dai, Y. Chen, J.T. Sakata, EGR-1 expression in catecholamine-synthesizing neurons reflects auditory learning and correlates with responses in auditory processing areas, *Neuroscience* (2018), doi: <https://doi.org/10.1016/j.neuroscience.2018.03.032>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

EGR-1 expression in catecholamine-synthesizing neurons reflects auditory learning and correlates with responses in auditory processing areas
