This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Tyrosine phosphorylation determines afterdischarge initiation by regulating an ionotropic cholinergic receptor

by:

Sean H. White, Raymond M. Sturgeon, Yueling Gu, Alysha Nensi, and Neil S. Magoski

Department of Biomedical and Molecular Sciences, Physiology and Neuroscience Graduate Programs,  
Centre for Neuroscience Studies, Queen's University, Kingston, ON, K7L 3N6, Canada

**Running title:** acetylcholine current regulation

Submitted to *Neuroscience* as a research paper

**Manuscript contains:** pages (37), figures (7), references (89), tables (0).

**Word count:** total (11182), abstract (239/250), introduction (507), experimental procedures (1684), results (2990), discussion (1615), figure legends (1874), references (2273).
