Title: Genetic association analyses and meta-analysis of Dynorphin-Kappa Opioid system potential functional variants with heroin dependence

Authors: Ji Yuanyuan, Su Rui, Tang hua, Cui Jingjing, Deji Cuola, Shi Yuhui, Wei Shuguang

PII: S0304-3940(18)30568-8
DOI: <https://doi.org/10.1016/j.neulet.2018.08.023>
Reference: NSL 33758

To appear in: *Neuroscience Letters*

Received date: 5-5-2018
Revised date: 16-8-2018
Accepted date: 19-8-2018

Highlights

- *PDYN* 68-bp VNTR modulates the susceptibility to heroin dependence.
- The HH genotype showed increased withdrawal times.
- The pooled effect of the H allele at this locus is a risk factor for heroin
