Title: Chemical chaperone 4-phenylbutylate reduces mutant protein accumulation in the endoplasmic reticulum of arginine vasopressin neurons in a mouse model for familial neurohypophysial diabetes insipidus

Authors: Masayoshi Tochiya, Daisuke Hagiwara, Yoshinori Azuma, Takashi Miyata, Yoshiaki Morishita, Hidetaka Suga, Takeshi Onoue, Taku Tsunekawa, Hiroshi Takagi, Yoshihiro Ito, Shintaro Iwama, Motomitsu Goto, Ryoichi Banno, Hiroshi Arima

PII: S0304-3940(18)30417-8
DOI: <https://doi.org/10.1016/j.neulet.2018.06.013>
Reference: NSL 33644

To appear in: *Neuroscience Letters*

Received date: 13-2-2018
Revised date: 28-5-2018
Accepted date: 6-6-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Chemical chaperone 4-phenylbutylate reduces mutant protein accumulation in the endoplasmic reticulum of arginine vasopressin neurons in a mouse model for familial neurohypophysial diabetes insipidus
