

## Accepted Manuscript

Title: Effects of Electrical Stimulation of the Rat Vestibular Labyrinth on c-Fos Expression in the Hippocampus

Authors: Martin Hitier, Go Sato, Yan-Feng Zhang, Stephane Besnard, Paul F. Smith

PII: S0304-3940(18)30304-5  
DOI: <https://doi.org/10.1016/j.neulet.2018.04.041>  
Reference: NSL 33564

To appear in: *Neuroscience Letters*

Received date: 26-3-2018  
Revised date: 16-4-2018  
Accepted date: 21-4-2018

Please cite this article as: Martin Hitier, Go Sato, Yan-Feng Zhang, Stephane Besnard, Paul F. Smith, Effects of Electrical Stimulation of the Rat Vestibular Labyrinth on c-Fos Expression in the Hippocampus, *Neuroscience Letters* <https://doi.org/10.1016/j.neulet.2018.04.041>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Revised for: *Neuroscience Letters*

16/4/18

## Effects of Electrical Stimulation of the Rat Vestibular Labyrinth on c-Fos Expression in the Hippocampus

### Highlights

- Few studies have investigated electrical stimulation of the vestibular system on the hippocampus (HPC) in rodents
- Here we investigated this in rats using c-Fos expression as a marker of activation
