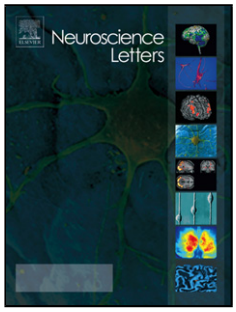
Accepted Manuscript



Title: Random Forest Based Classification of Alcohol Dependence Patients and Healthy Controls Using Resting State MRI

Authors: Xi Zhu, Xiaofei Du, Mike Kerich, Falk W. Lohoff, Reza Momenan

PII: S0304-3940(18)30262-3
DOI: https://doi.org/10.1016/j.neulet.2018.04.007
Reference: NSL 33530

To appear in: *Neuroscience Letters*

Received date: 11-4-2017
Revised date: 19-3-2018
Accepted date: 2-4-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Diagnosis of alcohol use disorder using resting state functional connectivity
- Quantify resting-state within-network and between-network connectivity features in a multivariate fashion
- Offer new insights into the identification of potential biomarkers for the clinical diagnosis of AUD
