Title: The mTOR cell signaling pathway is crucial to the long-term protective effects of ischemic postconditioning against stroke

Authors: Peng Wang, Rong Xie, Michelle Cheng, Robert Sapolsky, Xunming Ji, Heng Zhao

PII: S0304-3940(18)30247-7
DOI: <https://doi.org/10.1016/j.neulet.2018.03.062>
Reference: NSL 33521

To appear in: *Neuroscience Letters*

Received date: 9-1-2018
Revised date: 14-3-2018
Accepted date: 28-3-2018

Please cite this article as: Peng Wang, Rong Xie, Michelle Cheng, Robert Sapolsky, Xunming Ji, Heng Zhao, The mTOR cell signaling pathway is crucial to the long-term protective effects of ischemic postconditioning against stroke, *Neuroscience Letters* <https://doi.org/10.1016/j.neulet.2018.03.062>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The mTOR cell signaling pathway is crucial to the long-term protective effects of ischemic postconditioning against stroke
