

## Accepted Manuscript

Title: Individual differences in the processing of referential dependencies: Evidence from event-related potentials

Authors: Robert Fiorentino, Lauren Covey, Alison Gabriele

PII: S0304-3940(18)30090-9  
DOI: <https://doi.org/10.1016/j.neulet.2018.02.014>  
Reference: NSL 33406

To appear in: *Neuroscience Letters*

Received date: 10-7-2017  
Revised date: 7-2-2018  
Accepted date: 8-2-2018

Please cite this article as: Robert Fiorentino, Lauren Covey, Alison Gabriele, Individual differences in the processing of referential dependencies: Evidence from event-related potentials, *Neuroscience Letters* <https://doi.org/10.1016/j.neulet.2018.02.014>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Individual differences in the processing of referential dependencies: evidence from event-related potentials

**Highlights:**

- Examined referential ambiguity and referential failure using ERP
- Two different responder types emerged in the processing of referential ambiguity
- P600 elicited by referential failure in absence of an acceptability judgment task
