

## Accepted Manuscript

Title: Evidence for Existence of Trunk-Limb Neural Interaction in the Corticospinal Pathway

Authors: Atsushi Sasaki, Matija Milosevic, Hirofumi Sekiguchi, Kimitaka Nakazawa

PII: S0304-3940(18)30011-9  
DOI: <https://doi.org/10.1016/j.neulet.2018.01.011>  
Reference: NSL 33345

To appear in: *Neuroscience Letters*

Received date: 5-12-2017  
Revised date: 23-12-2017  
Accepted date: 4-1-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Evidence for Existence of Trunk-Limb Neural Interaction in the Corticospinal Pathway

**Number of words in the abstract:** 260 words

**Number of words (abstract, main text, references, table and figures legends):** 4973 / 5000

**Number of figures and tables:** 2 figures and 0 tables

**Number of references:** 26 references

**Highlights:**

- Interaction of trunk, limbs and jaw in the corticospinal pathway was examined.
- Trunk muscles contraction modulated corticospinal excitability of limb muscles.
- Limbs muscle contraction modulated corticospinal excitability of trunk muscle.
- Results showed evidence for trunk-limb interaction in the corticospinal pathway.
