Title: Central nervous system development-related microRNAs levels increase in the serum of gestational diabetic women during the first trimester of pregnancy

Authors: M. Lamadrid-Romero, K.H. Solís, M.S. Cruz-Reséndiz, J.E. Pérez, N.F. Díaz, H. Flores-Herrera, G. García-López, O. Perichart, E. Reyes-Muñoz, F. Arenas-Huertero, P. Eguía-Aguilar, A. Molina-Hernández

PII: S0168-0102(17)30246-8
DOI: <http://dx.doi.org/doi:10.1016/j.neures.2017.08.003>
Reference: NSR 4081

To appear in: *Neuroscience Research*

Received date: 26-4-2017
Revised date: 3-8-2017
Accepted date: 7-8-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Central nervous system development-related microRNAs levels increase in the serum of gestational diabetic women during the first trimester of pregnancy
