Perception of noise-vocoded tone complexes: A time domain analysis based on an auditory filterbank model

William P. Shofner, Hayley Morris, Mackenzie Mills

PII: S0378-5955(18)30042-X

DOI: [10.1016/j.heares.2018.07.003](https://doi.org/10.1016/j.heares.2018.07.003)

Reference: HEARES 7591

To appear in: *Hearing Research*

Received Date: 29 January 2018

Revised Date: 28 June 2018

Accepted Date: 2 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 Perception of noise-vocoded tone complexes: A time domain analysis based on an auditory
2 filterbank model
