Species of the *Metarhizium anisopliae* complex with diverse ecological niches display different susceptibilities to antifungal agents

Guilherme T.P. Brancini, Ludmilla Tonani, Drauzio E.N. Rangel, Donald W. Roberts, Gilberto U.L. Braga

PII: S1878-6146(17)30175-7

DOI: [10.1016/j.funbio.2017.12.004](https://doi.org/10.1016/j.funbio.2017.12.004)

Reference: FUNBIO 877

To appear in: *Fungal Biology*

Received Date: 19 October 2017

Revised Date: 4 December 2017

Accepted Date: 6 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Species of the *Metarhizium anisopliae* complex with diverse ecological niches display**
2 **different susceptibilities to antifungal agents**
