

Accepted Manuscript

Pathogenic potential of environmental resident fungi from ornithogenic soils of Antarctica

Jordana R.P. Sousa, Vivian N. Gonçalves, Rodrigo A. de Holanda, Daniel A. Santos, Cinthia F.L.G. Bueloni, Adriana O. Costa, Maria V. Petry, Carlos A. Rosa, Luiz H. Rosa

PII: S1878-6146(17)30128-9

DOI: [10.1016/j.funbio.2017.09.005](https://doi.org/10.1016/j.funbio.2017.09.005)

Reference: FUNBIO 851

To appear in: *Fungal Biology*

Received Date: 9 July 2017

Revised Date: 25 September 2017

Accepted Date: 26 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Ornithogenic soils from Antarctica

Potential pathogenic fungi

Polymorphism of potential pathogenic extremophile fungi

a Phagocytosis of fungal cells by amoeba
