Modelling potential wildlife-vehicle collisions (WVC) locations using environmental factors and human population density: A case-study from 3 state highways in Central California

Hoehun Ha, Fraser Shilling

PII: S1574-9541(17)30215-7
DOI: doi:[10.1016/j.ecoinf.2017.10.005](https://doi.org/10.1016/j.ecoinf.2017.10.005)
Reference: ECOINF 807
To appear in: *Ecological Informatics*
Received date: 3 August 2017
Revised date: 12 October 2017
Accepted date: 18 October 2017

Please cite this article as: Hoehun Ha, Fraser Shilling , Modelling potential wildlife-vehicle collisions (WVC) locations using environmental factors and human population density: A case-study from 3 state highways in Central California. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Ecoinf*(2017), doi:[10.1016/j.ecoinf.2017.10.005](https://doi.org/10.1016/j.ecoinf.2017.10.005)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Modeling potential wildlife-vehicle collisions (WVC) locations using environmental factors and human population density: a case-study from 3 state highways in Central California
