Small populations of fig trees offer a keystone food resource and conservation benefits for declining insectivorous birds

K.D. Mackay, C.L. Gross, M. Rossetto

PII: S2351-9894(18)30096-9

DOI: [10.1016/j.gecco.2018.e00403](https://doi.org/10.1016/j.gecco.2018.e00403)

Article Number: e00403

Reference: GECCO 403

To appear in: *Global Ecology and Conservation*

Received Date: 20 April 2018

Revised Date: 9 June 2018

Accepted Date: 9 June 2018
