

## Accepted Manuscript

Title: New specific molecular marker detects *Ficopomatus enigmaticus* from water eDNA before positive results of conventional sampling

Authors: Marta Muñoz-Colmenero, Alba Ardura, Laura Clusa, Laura Miralles, Fiona Gower, Anastasija Zaiko, Eva Garcia-Vazquez

PII: S1617-1381(17)30170-X  
DOI: <https://doi.org/10.1016/j.jnc.2017.12.004>  
Reference: JNC 25609

To appear in:

Received date: 29-3-2017  
Revised date: 15-11-2017  
Accepted date: 13-12-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**New specific molecular marker detects *Ficopomatus enigmaticus* from water eDNA  
before positive results of conventional sampling.**
