Parallel effect of 4-octylphenol and cyclic adenosine monophosphate (cAMP) alters steroidogenesis, cell viability and ROS production in mice Leydig cells

Tomas Jambor, Hana Greifova, Anton Kovacik, Eva Kovacikova, Eva Tvrda, Zsolt Forgacs, Peter Massanyi, Norbert Lukac

PII: S0045-6535(18)30213-3

DOI: 10.1016/j.chemosphere.2018.02.013

Reference: CHEM 20771

To appear in: *Chemosphere*

Received Date: 13 November 2017

Revised Date: 30 January 2018

Accepted Date: 03 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
