Effect of nano zero-valent iron application on As, Cd, Pb, and Zn availability in the rhizosphere of metal(loid) contaminated soils

Martina Vítková, Markus Puschenreiter, Michael Komárek

PII: S0045-6535(18)30330-8

DOI: [10.1016/j.chemosphere.2018.02.118](https://doi.org/10.1016/j.chemosphere.2018.02.118)

Reference: CHEM 20876

To appear in: *ECSN*

Received Date: 31 October 2017

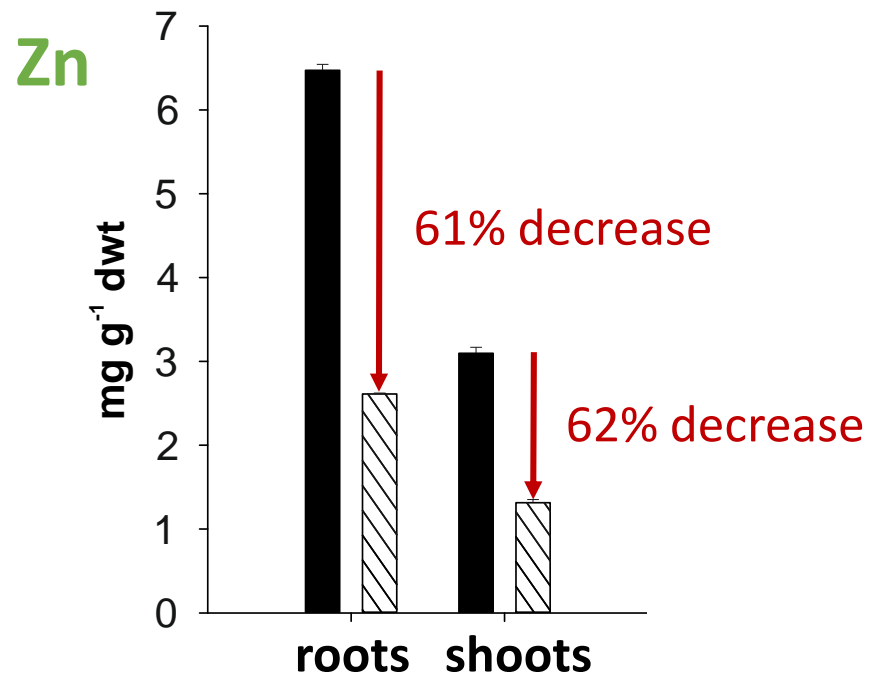

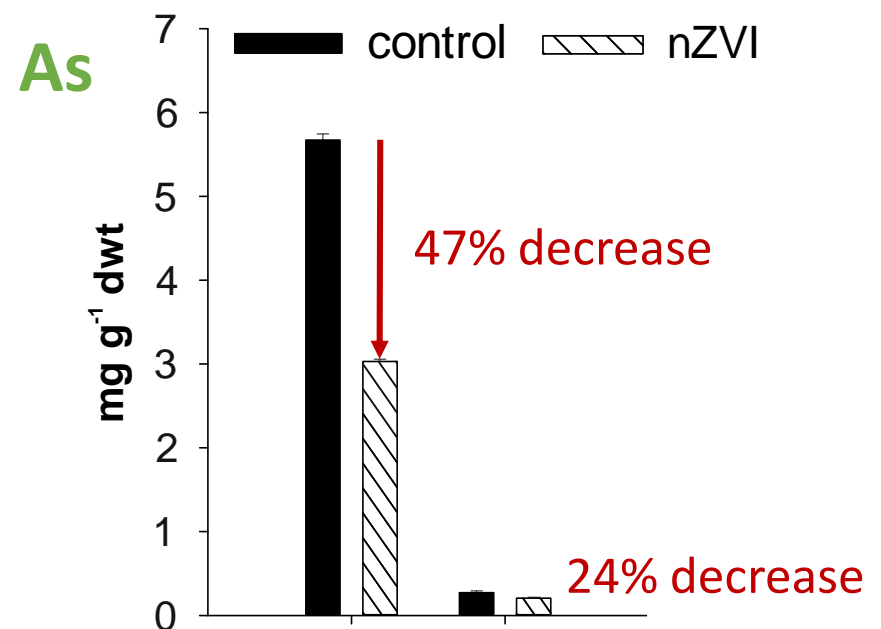

Revised Date: 3 February 2018

Accepted Date: 19 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
