Impact of sugarcane bagasse-derived biochar on heavy metal availability and microbial activity: A field study

Chengrong Nie, Xing Yang, Nabeel Khan Niazi, Xiaoya Xu, Yuhui Wen, Jörg Rinklebe, Yong Sik Ok, Song Xu, Hailong Wang

PII: S0045-6535(18)30346-1

DOI: 10.1016/j.chemosphere.2018.02.134

Reference: CHEM 20892

To appear in: *Chemosphere*

Received Date: 04 November 2017

Revised Date: 08 February 2018

Accepted Date: 21 February 2018

Please cite this article as: Chengrong Nie, Xing Yang, Nabeel Khan Niazi, Xiaoya Xu, Yuhui Wen, Jörg Rinklebe, Yong Sik Ok, Song Xu, Hailong Wang, Impact of sugarcane bagasse-derived biochar on heavy metal availability and microbial activity: A field study, *Chemosphere* (2018), doi: 10.1016/j.chemosphere.2018.02.134

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
