This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

HIGHLIGHTS

- Reviews the state of the art, challenges and research needs in the area of spill containment.
- Presents a number of examples of high-impact research on oil spill.
- Summarizes critical key performance parameters of solidifiers and solidified oil.
- Identifies knowledge gaps in the development of high-performance solidifiers.
