Combined use of microbial consortia isolated from different agricultural soils and cyclodextrin as a bioremediation technique for herbicide contaminated soils

J. Villaverde, M. Rubio-Bellido, A. Lara, F. Merchan, E. Morillo

PII: S0045-6535(17)31758-7

DOI: [10.1016/j.chemosphere.2017.10.172](https://doi.org/10.1016/j.chemosphere.2017.10.172)

Reference: CHEM 20194

To appear in: *ECSN*

Received Date: 4 April 2017

Revised Date: 30 October 2017

Accepted Date: 31 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Primary goal: Accelerated Diuron mineralisation

**Solution**

**Soil suspension**

**Soil  
(40% WHC)**
