Effect of electro-activated solutions of sodium acetate and sodium propionate on geosmin producing *Streptomyces avermitilis* strain

Viacheslav Liato, Mohammed Aïder

PII: S0045-6535(17)31425-X

DOI: [10.1016/j.chemosphere.2017.09.011](https://doi.org/10.1016/j.chemosphere.2017.09.011)

Reference: CHEM 19881

To appear in: *ECSN*

Received Date: 13 June 2017

Revised Date: 22 August 2017

Accepted Date: 3 September 2017

Please cite this article as: Liato, V., Aïder, M., Effect of electro-activated solutions of sodium acetate and sodium propionate on geosmin producing *Streptomyces avermitilis* strain, *Chemosphere* (2017), doi: 10.1016/j.chemosphere.2017.09.011.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Effect of electro-activated solutions of sodium acetate and sodium propionate on
geosmin producing *Streptomyces avermitilis* strain**
