Simultaneous removal of Cr(VI) and phenol contaminants using Z-scheme bismuth oxyiodide/reduced graphene oxide/bismuth sulfide system under visible-light irradiation

Acong Chen, Zhaoyong Bian, Jie Xu, Xin Xin, Hui Wang

PII: S0045-6535(17)31413-3

DOI: [10.1016/j.chemosphere.2017.09.002](https://doi.org/10.1016/j.chemosphere.2017.09.002)

Reference: CHEM 19872

To appear in: *ECSN*

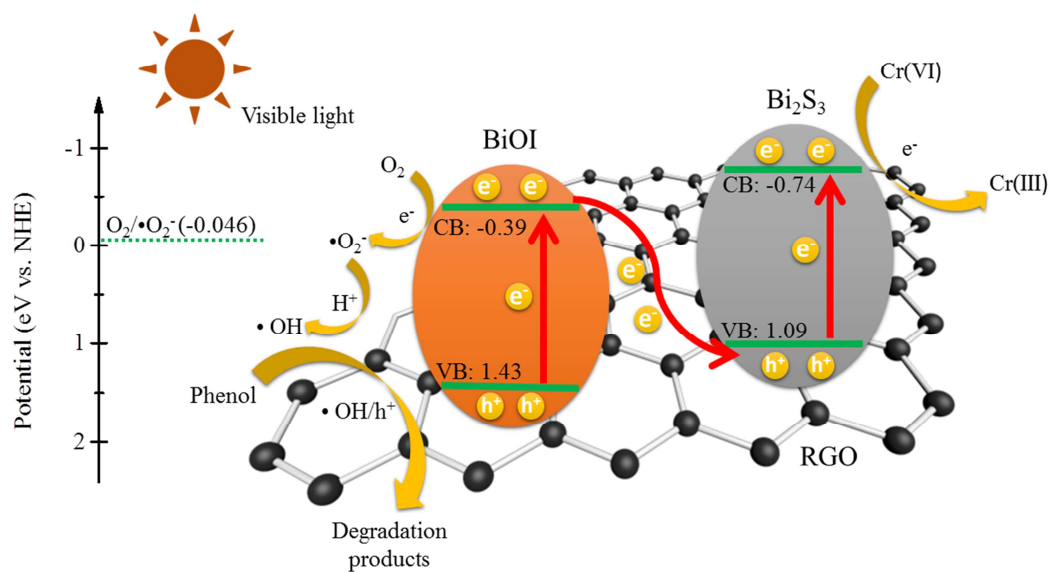

Received Date: 27 May 2017

Revised Date: 15 August 2017

Accepted Date: 1 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Proposed reaction mechanism of simultaneous removal Cr(VI) and phenol over BiOI/RGO/Bi<sub>2</sub>S<sub>3</sub> Z-scheme system.
