Influence of non-wetting, partial wetting and complete wetting modes of operation on hydrogen sulfide removal utilizing monoethanolamine absorbent in hollow fiber membrane contactor

Ali Taghvaie Nakhjiri, Amir Heydarinasab, Omid Bakhtiari, Toraj Mohammadi

PII: S2468-2039(17)30400-4

DOI: [10.1016/j.serj.2018.02.003](https://doi.org/10.1016/j.serj.2018.02.003)

Reference: SERJ 121

To appear in: *Sustainable Environment Research*

Received Date: 20 December 2017

Revised Date: 10 January 2018

Accepted Date: 28 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Received 23 December 2017

Received in revised form 10 January 2018

Accepted 28 February 2018
