This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Factors influencing PM concentrations inside vehicle cabin

- Windows - open and closed
- Air condition - with and without re-circulation
- Land use land cover - LULC
- Number of people
- Age and type of vehicle
- Mechanical or traffic induced abrasion
- Traffic intersections
- Seasons - winter and summer
