Rejection of divalent ions in commercial tubular membranes: Effect of feed concentration and anion type

Danial Qadir, Hilmi B. Mukhtar, Lau K. Keong

PII: S2468-2039(16)30285-0

DOI: [10.1016/j.serj.2016.12.002](https://doi.org/10.1016/j.serj.2016.12.002)

Reference: SERJ 66

To appear in: *Sustainable Environment Research*

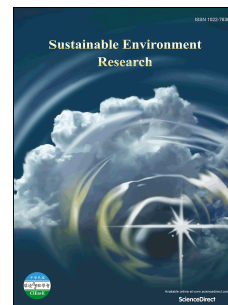

Received Date: 15 August 2016

Revised Date: 25 October 2016

Accepted Date: 14 December 2016

Please cite this article as: Qadir D, Mukhtar HB, Keong LK, Rejection of divalent ions in commercial tubular membranes: Effect of feed concentration and anion type, *Sustainable Environment Research* (2017), doi: 10.1016/j.serj.2016.12.002.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Received 15 August 2016

Received in revised form 25 October 2016

Accepted 14 December 2016

**Technical Note**

**Rejection of divalent ions in commercial tubular membranes: Effect of feed concentration  
and anion type**

**Danial Qadir\*, Hilmi B. Mukhtar, Lau K. Keong**

Department of Chemical Engineering, Universiti Teknologi PETRONAS, Bandar Sri Iskandar  
32610, Malaysia

**Keywords:** Tubular membranes, Calcium salts, Tin salts, Sulfate retention, Chloride retention
