Influence of saline groundwater discharge on river water chemistry in the Athabasca oil sands region – A chloride stable isotope and mass balance approach

Anita Gue, Stephen E. Grasby, Bernhard Mayer

PII: S0883-2927(17)30308-6

DOI: [10.1016/j.apgeochem.2017.10.004](https://doi.org/10.1016/j.apgeochem.2017.10.004)

Reference: AG 3961

To appear in: *Applied Geochemistry*

Received Date: 2 May 2017

Revised Date: 4 October 2017

Accepted Date: 9 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Influence of saline groundwater discharge on river water chemistry in the Athabasca oil sands**  
2 **region – a chloride stable isotope and mass balance approach**
