Comparison of the metal contamination in water measured by diffusive gradient in thin film (DGT), biomonitoring and total metal dissolved concentration at a national scale

Emmanuelle Uher, Jean-Philippe Besse, Olivier Delaigue, François Husson, Jérémie D. Lebrun

PII: S0883-2927(17)30066-5

DOI: [10.1016/j.apgeochem.2017.05.003](https://doi.org/10.1016/j.apgeochem.2017.05.003)

Reference: AG 3878

To appear in: *Applied Geochemistry*

Received Date: 20 January 2017

Revised Date: 20 April 2017

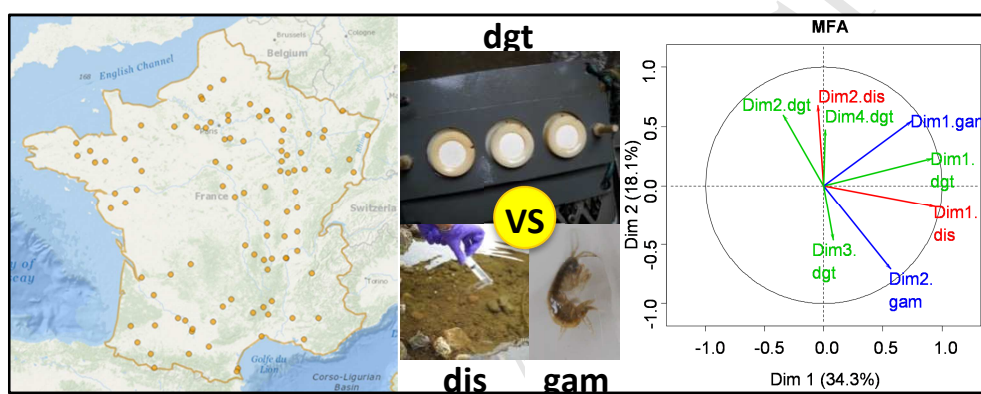

Accepted Date: 1 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Comparison of the metal contamination in water measured by diffusive gradient in thin film
(DGT), biomonitoring and total metal dissolved concentration at a national scale
