Detection of RO₂ radicals and other products from cyclohexene ozonolysis with NH₄⁺ and acetate chemical ionization mass spectrometry

Armin Hansel, Wiebke Scholz, Bernhard Mentler, Lukas Fischer, Torsten Berndt

PII: S1352-2310(18)30254-1

DOI: [10.1016/j.atmosenv.2018.04.023](https://doi.org/10.1016/j.atmosenv.2018.04.023)

Reference: AEA 15956

To appear in: *Atmospheric Environment*

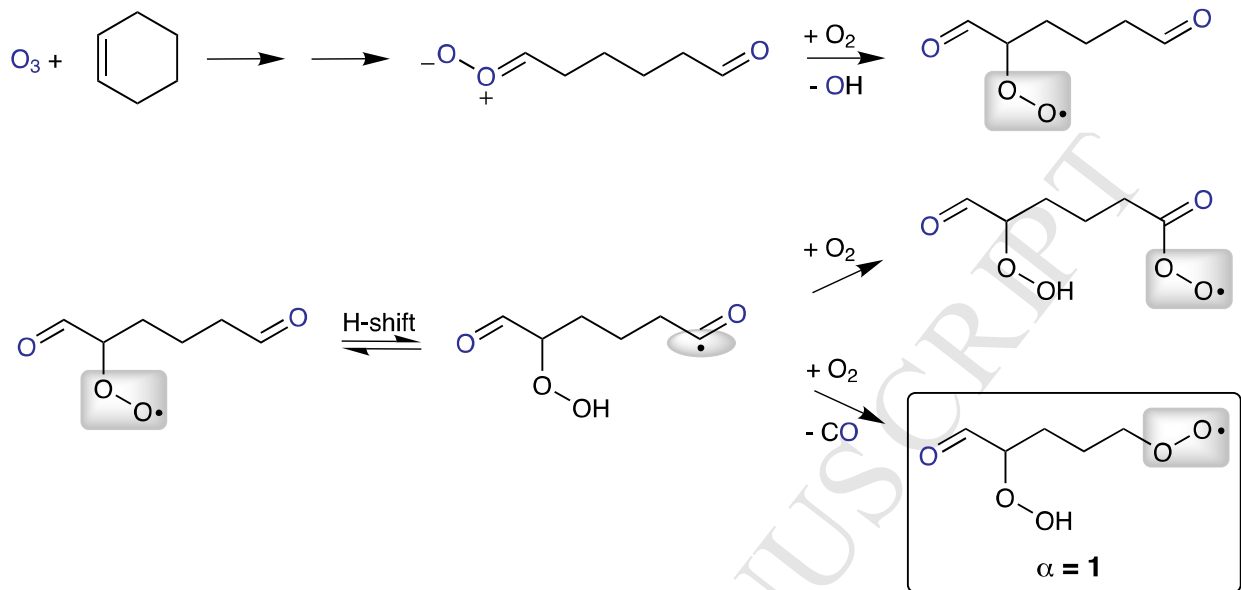

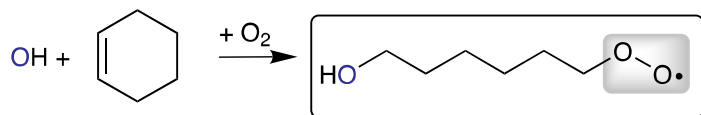

Received Date: 17 November 2017

Revised Date: 12 April 2018

Accepted Date: 14 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
