Impact of primary and secondary air supply intensity in stove on emissions of size-segregated particulate matter and carbonaceous aerosols from apple tree wood burning

Jian Sun, Zhenxing Shen, Leiming Zhang, Qian Zhang, Yali Lei, Junji Cao, Yu Huang, Suixin Liu, Chunli Zheng, Hongmei Xu, Hongxia Liu, Hua Pan, Pingping Liu, Renjian Zhang

PII: S0169-8095(17)30433-7
DOI: doi:[10.1016/j.atmosres.2017.11.010](https://doi.org/10.1016/j.atmosres.2017.11.010)
Reference: ATMOS 4113
To appear in: *Atmospheric Research*
Received date: 15 April 2017
Revised date: 7 October 2017
Accepted date: 6 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Impact of primary and secondary air supply intensity in stove on
emissions of size-segregated particulate matter and carbonaceous aerosols
from apple tree wood burning
