Optimization and evaluation of multi-bed adsorbent tube method in collection of volatile organic compounds

Steven Sai Hang Ho, Liqin Wang, Judith C. Chow, John G. Watson, Yonggang Xue, Yu Huang, Linli Qu, Bowei Li, Wenting Dai, Lijuan Li, Junji Cao

PII: S0169-8095(17)30821-9
DOI: doi:[10.1016/j.atmosres.2017.11.026](https://doi.org/10.1016/j.atmosres.2017.11.026)
Reference: ATMOS 4129
To appear in: *Atmospheric Research*
Received date: 28 July 2017
Revised date: 23 October 2017
Accepted date: 29 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Optimization and evaluation of multi-bed adsorbent tube method in collection of volatile organic compounds
