Scaling an Idealized Infant Nasal Airway Geometry to Mimic Inertial Filtration of Neonatal Nasal Airways

Scott Tavernini, Tanya K. Church, David A. Lewis, Andrew R. Martin, Warren H. Finlay

PII: S0021-8502(17)30402-0
DOI: <https://doi.org/10.1016/j.jaerosci.2017.12.004>
Reference: AS5230

To appear in: *Journal of Aerosol Science*

Received date: 16 October 2017
Revised date: 4 December 2017
Accepted date: 15 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
