

Accepted Manuscript

Towards an understanding of climate proxy formation in the Chew Bahir basin, southern Ethiopian Rift

Verena Foerster, Daniel M. Deocampo, Asfawossen Asrat, Christina Günter, Annett Junginger, Hauke Kraemer, Nicole A. Stroncik, Martin H. Trauth

PII: S0031-0182(17)30836-2
DOI: doi:[10.1016/j.palaeo.2018.04.009](https://doi.org/10.1016/j.palaeo.2018.04.009)
Reference: PALAEO 8734

To appear in: *Palaeogeography, Palaeoclimatology, Palaeoecology*

Received date: 13 August 2017
Revised date: 18 December 2017
Accepted date: 15 April 2018

Please cite this article as: Verena Foerster, Daniel M. Deocampo, Asfawossen Asrat, Christina Günter, Annett Junginger, Hauke Kraemer, Nicole A. Stroncik, Martin H. Trauth, Towards an understanding of climate proxy formation in the Chew Bahir basin, southern Ethiopian Rift. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Palaeo*(2018), doi:[10.1016/j.palaeo.2018.04.009](https://doi.org/10.1016/j.palaeo.2018.04.009)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Towards an understanding of climate proxy formation in the Chew Bahir basin, southern Ethiopian Rift
